

# Mobility Improvements in and Around Woodforest

WOODFOREST®

## Expansion of Fish Creek Thoroughfare

Fish Creek Thoroughfare is being expanded to four lanes from Woodforest Pkwy North to Jean Stewart Elementary. Planned completion: Summer 2014.

## Traffic Light Installation

A traffic light will be installed at the intersection of Fish Creek Thoroughfare and Woodforest Parkway North. The goal is to have the traffic light operational by late August when Stewart Elementary opens.

## Water Line Construction

San Jacinto River Authority is constructing a water treatment plant at Lake Conroe and installing 55 miles of water transmission lines to deliver 30 million gallons per day of top-quality, treated surface water. Segment T3 from Lake Creek Bridge Crossing to just south of Mulligan Drive is scheduled for completion by August.

## Woodforest Parkway Extension

Woodforest Parkway South – a new bridge is currently under construction on Woodforest Parkway South that will cross Fish Creek tributary and connect to Fish Creek Thoroughfare. Planned completion January 2015.

## Honea Egypt Expansion

Plans are underway to widen Honea Egypt from FM 1488 to its intersection with Sendera Ranch. The approximate mile-long project will convert the current two-lane roadway into a five-lane thoroughfare, providing an important north-south alternative to Interstate 45. Work is anticipated to begin after completion of the San Jacinto River Authority water line construction in that area.
